Nguyen Anh Nhu Huynh

Business Analyst Intern

0343371505 nguyenanhnhuhuynh@gmail.com Ho Chi Minh City https://www.linkedin.com/in/nguyenanhnhuhuynh

OBJECTIVE

IT student with hands-on BA experience across two end-to-end system design projects. Skilled in UML modeling, requirements documentation, and Agile user stories - translating stakeholder needs into structured functional specifications. Eager to contribute to a fast-moving product team.

PROJECT

Coffee Business Management System 09/2025 - 11/2025

Business Analyst

Description: Business analysis and system design for a multi-role SaaS café management platform supporting QR-based ordering, real-time kitchen notifications, automated inventory deduction, and online payment integration.
Tools/Methods: Microsoft Word/Excel, GitHub, ASP.NET Core, SQL Server, UML, Lucidchart, Agile User Stories
Responsibilities:

- Conducted stakeholder analysis across 6 user roles and identified key operational pain points including manual order recording, untracked inventory, and lack of real-time kitchen communication.
- Designed **AS-IS and TO-BE business process models** for QR ordering, counter order flow, and automated inventory deduction workflows.
- Modeled system requirements using **UML diagrams (Use Case, Class, Sequence)** to define interactions between customers, staff, managers, and system services.
- Defined **18 functional and 9 non-functional requirements** across core modules — order management, inventory control, staff management, and payment integration — with full MoSCoW prioritization.

PHT Fashion E-commerce Website 01/2026 - Present

Business Analyst

Description: Business analysis and system design for an e-commerce platform selling local Vietnamese fashion brands, focusing on order management, checkout workflows, and online payment integration.
Tools/Methods: UML, Flowcharts, Lucidchart, Agile User Stories, Microsoft Word/Excel, GitHub
Responsibilities:

- Gathered and analyzed business requirements, identified 5 operational pain points in the existing manual sales model, and conducted full stakeholder analysis across internal and external parties.
- Designed **AS-IS and TO-BE process models** for order management, checkout, and payment confirmation workflows.
- Modeled system requirements using **UML diagrams (Use Case, Class, Sequence)** covering customer ordering, cart management, and admin product and order management.
- Defined functional and non-functional requirements and created **User Stories with Acceptance Criteria** for core modules including product catalogue, payment integration, and discount code engine.
